the market having a clear vision
of the industry.

Safety

Pollution prevention

The organization follows environmental management standards for its core business. Through innovations in engineering, the shipping company manages to protect the environment and climate from negative impacts.

The company developed and implements a safety management:

We developed a range of measures for vessels safe operation and prevention of environmental pollution in accordance with the International Safety Management Code (ISM Code).

We obtained the Document of the Company Compliance and a certificate of registry for each vessel of our fleet.

The company policy includes:

- personnel policy
- safe navigation policy
- personnel safety policy
- technical management policy
- safe cargo operations policy
- managerial policy
- drug and alcohol policy
- pollution prevention policy

Logistics of cargo transportation and supply

We successfully implement logistic schemes during cargo transportation. Our long-term experience in shipping management and planning makes it possible for us to adapt rapidly to any changes in the industry, to individually treat each cargo owner, and to select the best solutions for clients.

Acting for the benefit and interests of the customer is the main rule of **YRB SHIPPING**. Strict control at each stage of the workflow ensures coordination, efficiency, and readiness to immediately respond to customer's requirements, which guarantees performance of contractual obligations at a high level.

Safety.

Pollution prevention.

The high level of the company standards complies with all international requirements. The liability, authorities and interaction between all staff members of vessels and shore units are clearly defined.

The company provides shore units and vessel crews with qualified and appropriately certified personnel in accordance with regulatory requirements and local standards; it promotes professional and career advancement of the shore and shipboard personnel and creates a special policy in the labor protection and occupational safety system.

Our company acquired sufficient competence in operation of liquid and dry cargo vessels of various deadweight.

- the company's fleet fully conforms to all international requirements and conventions.
- the company properly monitors the technical condition of its vessels.
